EDUCATION

Madhav Institute of Technology and Science
B.Tech (Electrical Engineer)

Gwalior, M.P. India
July 2018 - Jun 2022

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Libraries and Tools: Python-Selenium, Python-playwright, BDD Framework, POM (Page Object Model), TDD Framework, Hybrid Framework, JIRA, Git/GitHub, Jenkins, AWS, Postman API

Testing Methodologies: Functional, Non-Functional, Regression and API Testing, Agile methodology, SDLC/STLC

WORK EXPERIENCE

Business Quality Analyst

RxLogix India Pvt. Ltd., Noida, India

Aug 2025 - Currently

- * Partner with Product Owners, Business Analysts, developers, and stakeholders to analyze business requirements, define acceptance criteria, and ensure alignment with business objectives.
- * Review functional specifications, user stories, and change requests to enhance requirement quality, traceability, and testability.
- * Lead end-to-end quality assurance activities by defining test strategy, reviewing test coverage, and ensuring successful software releases.
- * Drive defect triage, root cause analysis, and risk assessment to facilitate timely issue resolution and continuous process improvement.
- * Support Agile delivery through backlog refinement, sprint planning, daily stand-ups, sprint reviews, and retrospectives.
- * Ensure compliance with validation processes and regulatory requirements by maintaining requirement traceability and reviewing validation documentation.
- * Mentor QA team members, conduct peer reviews, and promote quality assurance best practices across projects.

Associate Business Quality Analyst II

RxLogix India Pvt. Ltd., Noida, India

July 2023 - Aug 2025

- * Built and maintained modular, scalable automation frameworks, improving test reusability and reducing script maintenance.
- * Designed and executed automated and manual test plans and test cases to validate software functionality across complex pharmaceutical business applications.
- * Identified, reported, and tracked software defects using JIRA; collaborated with developers to ensure timely resolution and defect closure.
- * Performed functional, regression, exploratory, and integration testing to ensure release readiness and compliance with business requirements.
- * Integrated automated test scripts into CI/CD pipelines using Jenkins and GitHub Actions to support continuous testing and faster releases.
- * Collaborated with cross-functional teams, developers, and product owners to refine business processes and implement software solutions aligned with client requirements.
- * Created and maintained QA documentation including Test Cases, Requirements Traceability Matrices (RTMs), Validation Summary Reports, and Defect Reports.
- * Mentored junior testing engineers by providing guidance on software testing best practices, automation frameworks, and testing technologies.

Associate Business Quality Analyst I

RxLogix India Pvt. Ltd., Noida, India

Feb 2022 - Jun 2023

- * Collaborated with Business Analysts and QA Leads to understand software requirements and translate them into clear, executable test cases.
- * Performed extensive manual testing for pharmacovigilance web applications, including functional, integration, and regression testing.
- * Logged and tracked defects in JIRA, coordinated with development teams for resolution, and performed retesting and defect verification.

- * Actively participated in Agile Scrum ceremonies, including sprint planning, daily stand-ups, backlog discussions, and sprint retrospectives.
- * Supported User Acceptance Testing (UAT) cycles by gathering business-user feedback and coordinating issue resolution between QA and business teams.
- * Managed defect tracking and issue resolution through JIRA while contributing to functional requirements documentation and recommending process and application improvements.
- * Contributed to system validation by drafting test strategies and validation documentation while ensuring alignment with business and regulatory compliance standards.

PROJECTS

- **PV Admin (Pharmacovigilance Administration)- RxLogix Corporation**, Designed and executed comprehensive test scripts across core application modules to validate critical business requirements and automated regression suites to significantly cut execution time. Streamlined defect tracking and test case management using Jira, partnering cross-functionally with developers to perform Root Cause Analysis (RCA) on client-reported defects and implement preventative measures. Authored end-to-end SDLC and formal system validation deliverables—including Validation Test Plans (VTP), Test Scenarios, Operational Qualifications (OQs), and Validation Test Summary Reports (VTSR)—to ensure strict adherence to business and regulatory compliance standards.

REWARDS

- Receive accolades as the "Spot Award Member" 3 times in RxLogix.
